

Minimally Invasive Surgery Course - Keele Anatomy and Surgical Training

Start Date: 4/3/2025

End Date: 4/4/2025

This first BOFAS principles course has been designed as a collaborative project of the Education Committee of the Society with the help of expert surgeons experienced in percutaneous surgery. It is designed to teach high level percutaneous surgery, with a strong focus on hands on cadaveric lab exposure with 70% of the course time spent in the lab, one cadaveric specimen per delegate and a delegate to faculty ratio of 2:1 to allow for good, supervised instruction.

The course fee is heavily subsidised by Industry, includes 2 nights' bed & breakfast accommodation at Courtyard By Marriott Hotel Staffordshire, plus a course dinner at Keele Hall, Keele University on 3rd April, and as such is one of the best value independent cadaveric courses in the field. Following the ethos of all BOFAS instructional courses, the course will be conducted in an informal and interactive environment, to facilitate good discussions with faculty throughout the event.
