SEConnect

What can we do for you?

Here at Scottish Event Campus, we offer a wide range of IT and networking services, each tailored to the need of your event.

Wither it be an internet connection to support your registration desk, a private network to segment your events traffic or customised Wi-Fi designed around your delegates needs.
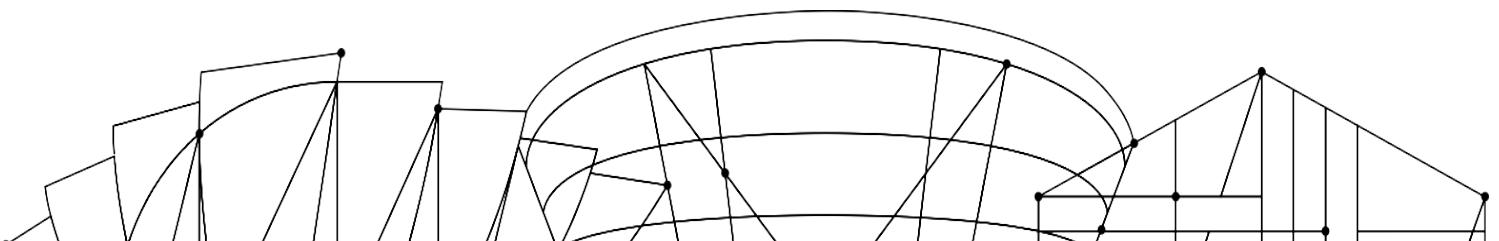

Hardwired Internet

Service	Description	Price (ex VAT)
10mbps	Suitable for email and messaging apps, and basic web browsing.	£300
50mbps	Suitable for running online registration platforms.	£500
100mbps	Suitable for HD streams, supporting interactive online sessions (audience participation apps)	£980
1Gbps	Dedicated bandwidth for event functions.	£4,000
8 port switch	Network hub to extend your connection. (additional cables not inclusive)	£130
24 port switch	Network hub to extend your connection. (additional cables not inclusive)	£300

Please note that the bandwidth speeds mentioned are maximum possible speeds. Actual speeds may vary and might not always reach the advertised levels.
1Gbps not included in "Each subsequent connection" rate.

Network Services

Service	Description	Price (ex VAT)
Layer 2 VLAN Configuration	Create a low latency, private LAN within our infrastructure for your event needs.	£5,500
Layer 2 VLAN Connection	Hardwired connection on your event VLAN in areas across our venue.	£120
Public IP Address	Need to talk to the outside world? We can provide a public facing IP address to allow traffic external to our network.	£1,300
DHCP Services	A dedicated range of private IP address.	P.O.A

SEConnect

Ensuring the Best Wi-Fi Experience for Everyone

At the Scottish Event Campus, we're committed to providing reliable, high-quality internet connectivity for all our clients and visitors—especially those using the paid for services through the SEConnect team.

We offer 5mbps complimentary Wi-Fi

To maintain a smooth experience for everyone, we have a Wi-Fi Clear Air policy in place for all events, agreed upon with your event organiser.

Our Clean Air Policy

To keep the network running at its best, only the Wi-Fi networks provided by the SEConnect team are permitted. Self-installed Wi-Fi networks are not allowed anywhere within the venue.

This means the following are not permitted:

• Wi-Fi access points (routers)

• MiFi devices (4G & 5G

• Mobile hotspots (sharing your mobile network)

• Any unlicensed devices operating on the 2.4Ghz, 5Ghz or 6Ghz spectrum
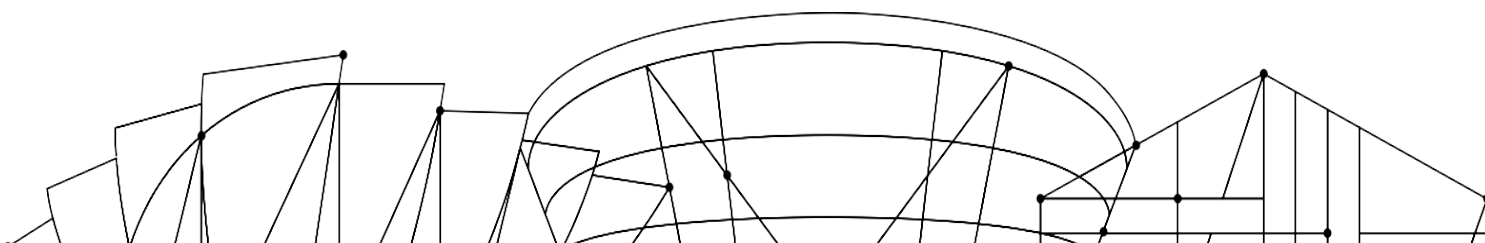

Why this matters

Unauthorised Wi-Fi networks can cause interference, leading to slow and unreliable connections for everyone attending the event. To prevent this, our team actively monitors the venue airspace and may detect and disable unauthorised networks to ensure a seamless experience for all exhibitors and visitors.

The above policy **MUST** be shared within your exhibitor manual, a PDF version of the policy is available via your event manager.

Need Wi-Fi?

Service	Description	Price (ex VAT)
