

Cardiff & Vale Orthopaedic Centre Fellowship

The foot and ankle unit currently has 5 consultants covering the full breadth of adult and paediatric elective/ traumatic foot and ankle conditions. From February 2021 there will be a sixth consultant specialising in diabetic foot and major trauma.

There is no over-night on call commitment however the fellow is expected to support the junior doctors cover the elective wards. There is ample opportunity for supervised surgical and outpatient activity. The department specialises in arthroplasty, arthroscopy and minimally invasive surgery.

The fellow is expected to participate in the research activities of the department and there is a strong track record of publication including several BOFAS awards over the last 10 years.

Our post CCT fellows have gone on to substantive foot and ankle consultant posts.
