

Northumbria Foot & Ankle Fellowship

A healthy mix of Foot & Ankle elective as well as specialist trauma experience. The unit performs around 45 ankle replacements a year along with multitude of ankle arthroscopies/arthroscopic fusions and complex hind-foot deformity correction surgery. The operative exposure can be tailored to the needs to the fellow. There is a weekly MDT to discuss complex cases and a monthly complex case clinic. The post has a potential to be included in the BOA Clinical Leadership program if the Fellow wishes to pursue that option.
