9. What were the highlights?( please answer in box)

I joined this placement during pandemic. In spite of limitations posed by the pandemic, I had an excellent exposure to a range of primary and complex foot and ankle presentations.

Highlights of the placement include:

- Operative exposure - dealing with complex hindfoot procedures, including soft tissue reconstruction, arthrodesis and arthroplasty.
- Outpatient exposure – primary and complex tertiary referrals – covering a range of foot and ankle

presentations

- Multidisciplinary team meetings – discussing complex cases
- Regional foot and ankle meetings – following a set topic program of common foot & ankle presentations
- Research activities – one publication – working on the second study

And the best part – a very friendly and encouraging unit, with good harmonious work atmosphere, helping trainees excel in their career.
