

## Are we ready for GDPR?

The General Data Protection Regulation (“GDPR”) is the new legal framework that will come into effect on the 25th of May 2018. The GDPR’s focus is the protection, collection and management of personal data.

The BOFAS registry is very well placed to endure this transition period, with the new consent form designed specifically for GDPR.

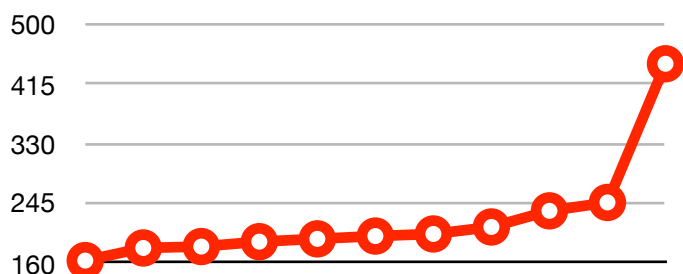

## Active BOFAS Registry Sites

## TORUS Update

Trauma and Orthopaedic Registries Unifying Structure (TORUS) is the BOA project to support the development of new registries and national audit. The last TORUS meeting concentrated on ensuring the GDPR compliance and working on registry consent. The BOFAS registry is well placed on consent, with other registries adopting our consent process.

## Number of Pathways Registered over Last Year

## Upcoming Features

Trauma pathways are currently being investigated.
