Registry: Using Amplitude

Adding a patient:

- To add a patient click the plus shaped icon on the dashboard.
- As you enter the data the system will check that this is not a duplicate.
- You will be prompted to enter remaining details: dob, email address etc.
- You will also be asked to confirm Consent: it is very important to obtain your patient's consent prior to entering their data on the registry. This must be documented using the check button.**
- We strongly recommend the paper copy of the consent form is retained in the patients casenote.**
- It is not essential to enter the postal address or phone numbers, but these may be of help to your delegates when collecting or processing data.

Hospital Number		National Identifier	
<input type="text"/>		<input type="text" value="NHS"/> <input type="text"/>	
Title	Forename	Middle Name	Surname
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

Pathway:

- You will be prompted to select a pathway type:
- If performing a *1st MTPJ Arthrodesis* or *Ankle Arthrodesis*, please select the specific pathway.
- Other procedures should be entered via the generic *BOFAS Foot and Ankle pathway*.

Patient search:

- You can search for patients who's details may already have been entered using the magnifying glass icon.
- You can then add to or edit information in the pathways and review any outstanding tasks.
